Products

Important: A word about this catalog. We have tried to make this catalog as comprehensive and factual as possible. However, since the time of printing, some of the information may have been updated. Check with your Kennedy supplier for complete information. The right is reserved to make changes at any time, without notice, in prices, materials, specifications and models.

Chest and cabinet dimensions are given without hardware. Cabinet dimensions with casters. Width is left to right; depth is front to back; height is top to bottom.

Machinists' Chests facts and features.

Drop-front panels are double-wall construction for added rigidity and tool security. Your valuable tools can't walk away with the drop-front panel in place and the chest locked. Front panel conceals and secures drawers. Stores in base when not in use.

Take a look at the double-wall side panel. Both an inner and outer steel wall in a critical chest area. Look at the full-depth slides and slide carrier channels, too. This integral, side panel/slide construction evenly distributes and transfers drawer loads to the chest bottom panel. An important aid in eliminating stress on the chest spot welds.

Thick, wool felt drawer liners help keep tools clean and protect against corrosion.

Kennedy uses 750 cylinder lock and milled key changes to help protect your chest's contents. All Kennedy chests and cabinets come with two keys.

Chest lid hinges are equipped with rust-resistant, stainless-steel pins which are staked to prevent punch-out and lid removal.

Take the two-piece drawer slides on Kennedy machinists' chests. They are stronger than one-piece slides which have weak shoulder areas and may split under heavy drawer loads. Slide limit stops keep the drawers from extending beyond the chest frame. Spring clips on the slides allow drawer removal for cleaning.

Machinists' Chests

3-DRAWER

Apprentice 620

Drawers and top till wool felt-lined.

Vinyl cushioned, steel core top handle.

Four adjustable, zinc coated steel drawer dividers standard. Spring clips hold in place.

Brown wrinkle finish.

26	26 ³ / ₄	12 ¹ / ₂	9	10	13

Mechanics' Chests facts and features.

Two-piece, I-beam drawer slides permit smooth, easy full drawer extension. And, they're stronger than one-piece slides which have weak shoulder areas and may split under heavy drawer loads.

Slide limit stops keep drawers from extending beyond the chest frame. Spring clips on the slides allow drawer removal for cleaning.

Rugged, cap-end construction on chest lids uses one of the strongest, self-reinforcing structural designs known to keep lids square and weathertight.

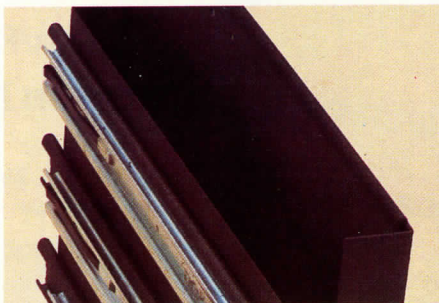

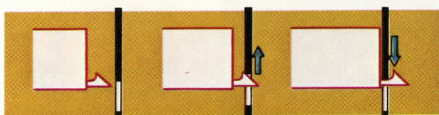

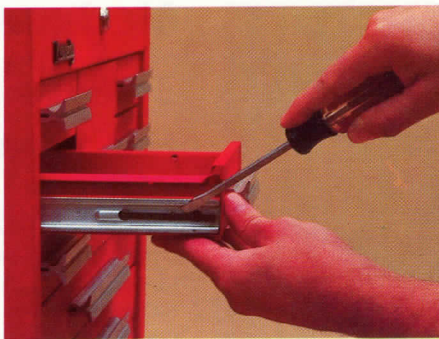

The tamper-proof, internal drawer locking system cannot be reached by bolt cutters or hacksaw. Or damaged when one drawer is closed with the chest locked.

Smooth operating, full-length chest hinges are staked and securely welded to prevent lid removal.

Deep embossed, inner lid panel reinforces chest lids. Helps keep lids square and rigid for easy opening and closing.

One-piece, heavy-gauge steel back, bottom and top till panels are securely welded to the double-wall side panels; giving the chests a tight, solid, fit. This integral, chest construction evenly distributes and transfers drawer loads to the chest bottom panel. An important aid in eliminating stress on the chest spot welds.

All chest exposed edges are rolled and flattened for added strength and safety.

Mechanics' Chests

3-DRAWER

Handyman 263

Drawers lock automatically when the lid is closed.

Double lid stays safely hold lid open.

Partitioned top till holds lift-out tray equipped with socket set divider.

Choice of brown or red wrinkle finish.

No.	Drawers	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
		Width	Depth	Height

	9	9 ⁷ / ₈	10 ³ / ₄	1 ¹⁵ / ₁₆		
	2	29 ⁷ / ₈	10 ³ / ₄	1 ¹⁵ / ₁₆		
	1	29 ⁷ / ₈	10 ³ / ₄	2 ¹⁵ / ₁₆		

Roller Cabinets facts and features.

Cabinet top panels are rib embossed for added strength and rigidity. Ribs also allow air to penetrate between facing surfaces of chest and cabinet to help combat rust.

Durable, 2 mil thick baked wrinkle finish helps fight corrosion, abrasions and chipping. Rust resistant metals or metal treatments help protect the beauty of your cabinet hardware, too.

Ongoing vibration, load, impact and other destructive testing before, during and after assembly makes sure the products are built right. Every unit is inspected after final assembly to further improve quality control. And protect your investment.

Full-depth, slide carrier channels provide support for the two-piece, I-beam drawer slides. And, play a large role in maintaining drawer balance. Slide limit stops keep the drawers from extending beyond the cabinet frame. Spring clips on the slides allow easy drawer removal for cleaning.

Heavy-gauge steel top, bottom and back panels are securely welded to the double-wall side panels; giving the cabinet a tight, solid, fit. This integral, cabinet construction evenly distributes and transfers all drawer loads to the cabinet bottom panel and casters.

The heavy-gauge steel, one-piece cabinet bottom panels are cross-embossed to provide added strength and greater load capacity without sagging.

The tamper-proof, internal drawer locking system on Kennedy cabinets cannot be reached by bolt cutters or hacksaw. Or damaged when one drawer is closed with the cabinet locked.

Easy-roll, low-drag five inch solid rubber casters can be used in most wet or corrosive environments. Two rigid, two swivel with toe locks standard on all cabinets except 202 and 206.

The one-piece bottom panels are also welded outside the cabinet body for a hand-in-glove fit. Gives the cabinets a solid foundation to help absorb bumps and eliminate stress on the cabinet spot welds. It also provides an edge of protection if you accidentally strike the heel of someone walking ahead of you with the cabinet.

Adjustable, aluminum drawer dividers are standard on all 27, 29 and 34 inch cabinets. Help provide more tool separation without paying for more drawers. Held in place by spring clips to prevent shifting.

Roller Cabinets

2-DRAWER

202

Use with 220, 620 or 520 chests.

Turns dead-end space in home garages or basements into a handy tool stash.

Lockable, swing-down panel conceals drawers and spacious storage compartment.

Three inch swivel casters standard.

Choice of brown or red wrinkle finish.

No.	Drawers	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
		Width	Depth	Height

Cantilever Tool Boxes

17 INCH

1017

You'll like the way it opens to see all your tools at a glance.

Quality plated locking hardware and vinyl cushioned, steel core handles make these boxes a pleasure to own and use.

No.	Trays	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
		Length	Width	Height		
1017	4	17 ³ / ₁₆	8 ³ / ₁₆	10	12.5	13
Trays:		2	Have six compartments each			

18 INCH

1018

Hip-roof, divided lid design lets you take along more than you thought possible.

Same specifications as 1017 except: dimensions and weights.

No.	Trays	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
		Length	Width	Height		
1018	4	18 ¹ / ₈	10 ¹ / ₁₆	12 ⁵ / ₈	18.25	19.5
Trays:		2	Have six compartments each			

22 INCH

1022

Room to spare. Keeps tools where you need them, when you need them.

Same specifications as 1017 except: Dimensions, weights and one tray has divider for storing socket sets.

No.	Trays	Dimensions (Inches)			Net Wt. Lbs.	Ship Wt. Lbs.
		Length	Width	Height		
1022	4	22 ¹ / ₈	10 ¹ / ₁₆	12 ⁵ / ₈	21	22.5
Trays:	2	Have seven compartments each				
	1	Has divider for storing socket sets				

NOTE: All products on this page finished in brown wrinkle with tan enamel trays. Dimensions are given without hardware. Length is left to right; width is front to back; height is top to bottom.

A. Tray levers ride on shoulder rivets. Act as solid bushings to keep trays working smoothly for years.

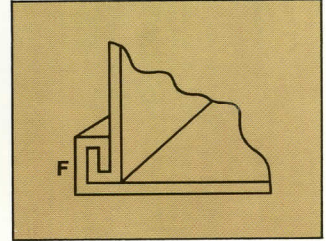

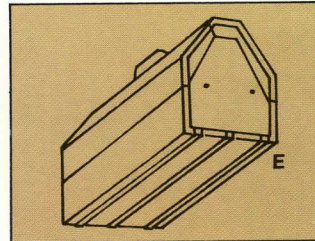

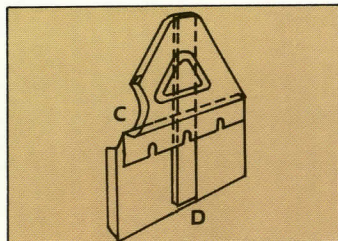

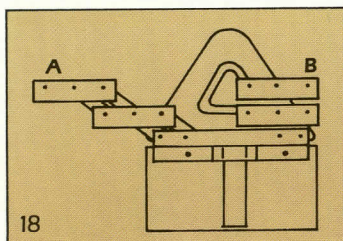

B. Trays rest on box support ledges. Keeps trays aligned and contents from spilling or mixing.

C. Double-wall construction on the box ends provide added rigidity and value.

D. Welded-in "T" bar gives boxes added strength and rigidity. Keeps box ends from bowing in or out.

E. Three welded-on steel skid rails help the box to survive bumps and bruises on the job.

F. Double-seamed construction on the box ends help keep cantilever boxes square and weathertight.

Professional Tool Box facts and features.

Overlapping body and lid edges are rolled and flattened for added strength, weather protection and safety.

Hardware quality makes a big difference in the price and life of any tool box.

Kennedy uses only the best... heavy-duty and heavily plated.

Double-seamed ends on S19, CS16 and CS19 boxes help keep the boxes square, rigid and weathertight.

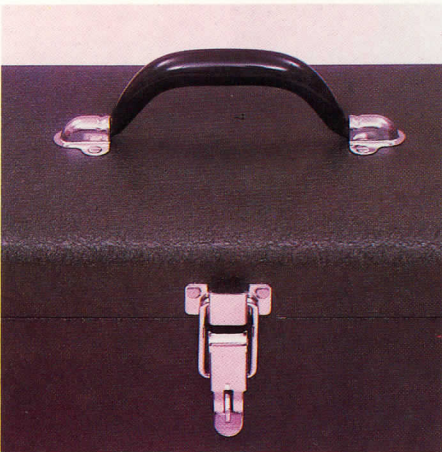

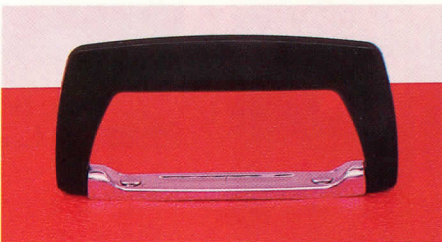

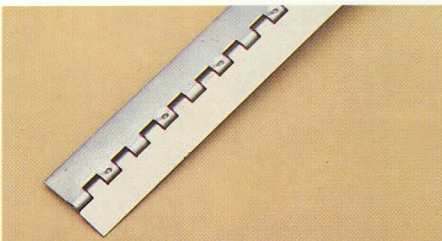

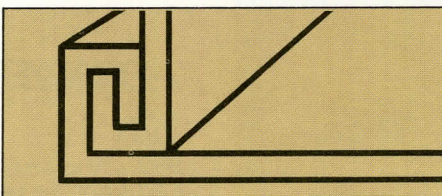

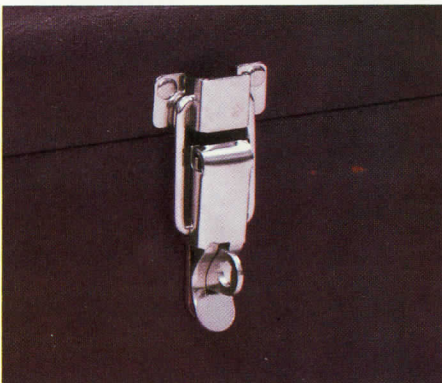

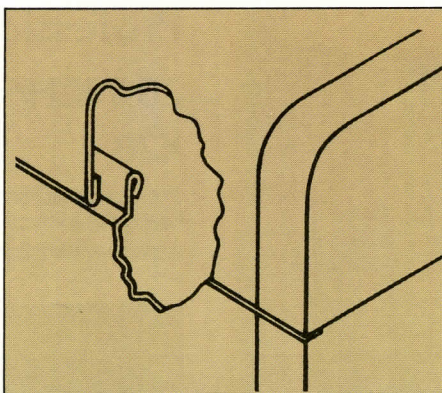

The lid hinges on all Kennedy professional tool boxes except KK16 and KK19 units, are equipped with stainless steel, rust-resistant pins. And, they're staked to prevent pin punch-out and lid removal.

Rugged, durable, comfort grip polypropylene handles are built to last. And, lab tested with 75 pound loads.

Models S19, CS16, CS19, KK16 and KK19 boxes are equipped with this plastic handle.

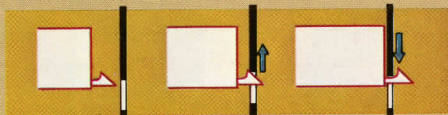

Man size, vinyl cushioned, steel core handles are lab tested with a 100 pound load. Load tested boxes are raised and lowered thousands of times to ensure the handles will survive rugged use at home or on the job.

Models 1017, 1018, 1022, K20, K24, 220, K32 and K32X are equipped with this handle.

Tamper-proof, internal drawer locking system cannot be reached by bolt cutters; or damaged when one drawer is closed with the chest locked.

Professional Tool Boxes

20 INCH

K20

These popular tool organizers help keep your tools off-the-shelf new. Brown wrinkle finish, tan enamel tray.
